9" Bearing Kits

#8670,8673,8664 Date 3/1/13

WILD HORSES has provided the following tech info for you to consider in the event of any fitment issues and to help with bearing identification.

There just two common 9" bearing kits that were stock in your 66-79 Bronco. These are identified by the size of the carrier bearings.

1969 and older 28 spline #8670
LM501349/LM501310
ID 1.625" OD 2.891"

1970 and newer 28/31 spline #8673
LM102949/LM102910
ID 1.78 OD 2.891

Next we have the curve ball which could be found in older Ford muscle cars.

1969 and older 31 spline #special order only
LM603049/LM603011
ID 1.78 OD 3.062

Last is a kit specifically for 35 spline
LM104949/LM104911
ID 2.00 OD 3.25
